Coalesse's Denizen case goods, see page 44...

rock the house

Residential designer Campion Platt has teamed up with HBF Textiles to present the Campion Platt collection of six elegant patterns.

Among them, **Rock Ledge** renders its namesake inspiration via staggered lines in a polyester woven. **space 387**

organize this

Part shelf system, part filing and storage cabinet, Global—The Total Office's **Kargo** also offers a solution for space dividing via its open, cubby-like shelves and tall height. (Shown here with a custom vinyl appliqué.) **space 1035**

size matters

You may think big when you hear the word "bison," but Simon Pengelly's **Bison** chair for Allermuir actually sports a small footprint. The compact tub chair features broad shoulders, a square seat filled with molded foam, and wing-like arms. **space 8-4030**

let's get flexible

Molo Design's Softblock modules feature a honeycomb structure that expands and contracts to form sculptural walls and seating, offering multiple configurations to interior spaces. Composed of unbleached kraft paper made with 50 percent recycled fiber, they also come in translucent white or opaque black polyethylene. **space 7-4050**

win green! An eco getaway can be yours. **Go to page 2...**
