HISTORICAL TROPICAL

PALM BEACH, FL

Transforming this charming example of a 1926 Palm Beach house by architect Gustav Maas was a study in restraint and embellishment. We traversed the process of having the house land marked and won the 2008 Preservation Award for our efforts. While maintaining the historic exterior, we played with the interior layout. We kept the gracious entry and opened up what was once a series of formal rooms. This new open plan helped set the tone for a more relaxed and casual lifestyle. The interiors are filled with vibrant tropical hues and clean modern furniture forms. Each room now flows seamlessly into the next and gives the overall feeling of a playful and joyous place to retire and escape.
